Environmental Policy Statement

It is Borough Engineering Services Ltd (BES) & Throgmorton Mechanical and Electrical Services (TMES) Policy to plan and execute operations in an environmentally sensitive manner to minimise consequential environmental impacts. Every member of BES & TMES is committed to fulfilling BES & TMES's legal obligations and other requirements to which the company subscribes, to ensuring the conservation of natural resources, to the prevention of pollution and the elimination of environmental hazards which may be associated with BES & TMES's operations.

To ensure achievement of this policy an Environmental Management System is established to meet, and to continue to meet, the requirements of BS EN ISO14001:2015.

BES & TMES's Environmental Objectives are:

- ✓ To maintain awareness of and to comply with appropriate environmental legislation, regulations and accepted standards and codes of practice.
- ✓ To fully meet customer and interested parties stated and/or perceived environmental expectations by the prevention of pollution and the provision of M&E Services
- ✓ To minimise the environmental impact of operations through reinvestment of new techniques, adoption of the most environmentally friendly way of undertaking our works and employee training in best practices.
- ✓ To continually review and monitor all aspects of the company's activities to identify opportunities for implementing environmental performance improvement.
- ✓ To ensure that this policy and supporting processes are understood by and communicated within the organisation and that this policy is available to the public.
- ✓ To monitor Climate Change Objectives through Carbon Footprinting Reporting, Legislation changes and guidelines.

Environmental Management implementation is through the IMS which is mandatory in its application. However, it's success can only be achieved by the participation and commitment at everyone at BES & TMES. All persons working with and for BES & TMES's organisation will receive full support to ensure the IMS is understood, implemented, and maintained throughout.

It is BES & TMES's responsibility to ensure IMS functions correctly and its effectiveness is maintained through monitoring, control, audit, and review.

Jeff Pollitt
